2006 Honda S2000 GT The Honda S2000 series launched on 1999 to celebrate the company's 50th anniversary. When new these cars had the highest power output for a naturally aspirated production car. The engines had the Honda fabled VTEC engine and in this car, came "On the Cam" at 6500 revs, and went on to a red line at 9200 rpm. These still are the most amazing cars to drive. This particular car, a 2006 GT model is finished in Moonrock Metallic with black Leather interior. The GT means the car come with both Hardtop and Electric Folding Soft top. An absolutely stunning car, having covered just 6500 miles with three owners from new, and it has Honda Service History. This car is priced at £32995. The thing is, find me another with a genuine 6350 miles from new. Yes, it could be a daily driver, but wouldn't it be better in your private collection!
